YOUR KEY BENEFITS

STAY AHEAD OF CYBER THREATS

- » Stay ahead of cybercriminals and block even the most sophisticated threats with AI-powered email security features.
- » Simplify and streamline the management of email-related compliance and legal requirements.

DATA IS KING. DON'T RISK LOSING IT

- » Automatically backup and easily recover mailboxes, Teams, Planner, OneNote, OneDrive for Business accounts and SharePoint document libraries.
- » Store data in accordance with your local data protection requirements thanks to our 12 regional data centers, independent of Microsoft's infrastructure.

BEST-IN-CLASS SECURITY AWARENESS TRAINING FOR YOUR NEXT-GEN HUMAN FIREWALL

- » Transform your employees into another line of defense with AI-powered, fully automated security awareness training.
- » Let the realistic, individually crafted spear phishing simulations paired up with needs-based, relevant e-training content train your employees for you.

TAKE CONTROL OF FILE SHARING AND ELIMINATE CONFIDENTIAL DATA EXPOSURE

- » Take control of file sharing in Microsoft 365 and avoid unwanted data exposure.
- » Get a clear permission overview, assign out-of-the-box best practices or custom-made sharing policies, and get alerts and action compliance violations.

COMPLETE CONTROL AND MONITORING OF ALL EMAILS SENT UNDER YOUR DOMAIN

- » Easily set up and manage DMARC, DKIM, and SPF best practice-policies for multiple domains through a single, centralized platform with intuitive UI.
- » Gain actionable insights into who is sending emails via your domains to protect your domain reputation, while significantly increasing the chances legitimate messages reach intended inboxes rather than spam folders.

SECURE THE CONFIDENTIALITY OF YOUR COMMUNICATION

- » Avoid misdirected emails and accidental data leaks by assisting your email users to always select the right recipients and avoid sharing sensitive information.
- » AI-based adjustment mechanisms factor in user behavior and responses, to automatically adjust warnings and suggestions issued in upcoming communications.

AUTOMATE THE ANALYSIS AND RESPONSE OF REPORTED EMAILS

- » Empower your employees with AI Email Security Analyst to automatically receive a live and AI-powered analysis of their email reports, indirectly training them on best email security practices.
- » Free up SOC resources while not only maintaining but also improving email security services thanks to automation and instant feedback.

PROTECT YOUR TEAMS CHATS FROM MALICIOUS URLS AND SECURITY BREACHES

- » Warn users whenever malicious links are shared through Teams chats.
- » Delete entire conversations containing malicious messages and prevent their senders from logging into Teams.
