

## SAVE MONEY ON LICENSES WITH ADDITIONAL COST-EFFECTIVE MAILBOXES WITHIN EXISTING M365 LICENSE AGREEMENT

Do you often work with external staff such as consultants or freelancers? Since they usually only communicate on behalf of your company for a certain period of time, you can do without additional Microsoft licenses. The same applies to employees who do not permanently need the full range of Microsoft 365 functions, as is often the case with warehouse and production employees.

Hornet.email is the ideal cost-effective mailbox for external and internal associates within existing M365 license agreement, which can be easily combined with Microsoft 365 and offers AI-based protection mechanisms.

### HOW DOES **HORNET.EMAIL** HELP YOU IMPROVING YOUR EMAIL ENVIRONMENT?

-  **Built-in Spam & Malware Protection** – Highest spam and virus detection rates on the market.
-  **One domain, multiple email services** – Save costs and utilize inexpensive email alternatives under one domain without compromising security.
-  **Several features for collaborative teamwork** – Email mailboxes, calendar, address books, and tasks.
-  **An inexpensive alternative for M365 for non-power users with the full potential of 365 Total Protection.**

## RELIABLE FEATURES AND EFFICIENT ANALYSIS MECHANISMS FOR SECURE CORPORATE COMMUNICATIONS:

**Synchronization across all devices:** Hornet.email can be accessed via a web interface, native clients or Outlook clients from all common modern PCs (Windows, Mac, Linux) and mobile devices (iOS, Android). Users can access not only all their emails, but also their calendar and tasks - simply, securely and without compromise.

**Collaborative compatibility:** Hornet.email supports various calendar and task formats such as WebDAV, CalDAV, CardDAV, WebDav, Webcal and ical.

**Guaranteed availability:** The average annual availability of email using SMTP and Hornet.email interfaces and the web interface is 99.99%.

**Automatic storage of emails:** Once a day, all email in the mailbox is backed up. This backup is kept for 14 days.

**Automated encryption via TLS:** Emails are sent via a TLS encrypted channel, provided that the counterparty supports TLS transmission.

**Deny and allow lists:** Authorized users can maintain their own allow- and deny lists. They can be configured in several ways, e.g. using the Proofpoint control panel or quarantine report.

**Content filter for file attachments:** Unwanted attachments can be rejected or moved to quarantine. Adjustable content filter, protection against malware and enforcement of company policies, size limitation of emails adjustable protection against impairment of the mail server and mail traffic due to excessive data volume.

**Compliance filter:** Create specific rules for automated application to inbound and outbound email.

## HORNET.EMAIL: FLEXIBLE, SIMPLE AND SAFE WITHOUT COMPROMISE

The booking options and combination possibilities for new as well as existing customers make Hornet.email a flexible all-around and offer users a collaboration platform tailored to their needs with a variety of security features.

Hornet.email can be booked in two different packages: The Starter Package includes the cloud-based Hornet.email platform and Hornet.email's Spam and Malware Protection. With the Hornet.email Enterprise Package, you also benefit from the services Advanced Threat Protection, Email Encryption and Archiving.

The Hornet.email Add-On offers existing customers the possibility to add as many mailboxes as they wish. Each mailbox is hosted on Proofpoints servers and receives exactly the same protection as the existing mailboxes. Hornet.email can be combined with Microsoft 365 within your existing domain or is available as a stand alone solution.
